bili-hut™

The bili-hut™ brings hospital-grade care to families, reducing inpatient stays and readmissions.

Perfect for neonatal outreach services — keeping babies safe and families together, right where they belong:
at home.

Why bili-hut™?

- **Reduces phototherapy time** —
an average of 15.1 treatment hours.
- **Reduces inpatient stays** —
supports earlier discharge.
- **Prevents readmissions** —
effective, proven home-based treatment.
- **Keeps families together** —
care delivered in the comfort of home.

Designed by a neonatologist
in America. *Trusted worldwide.*

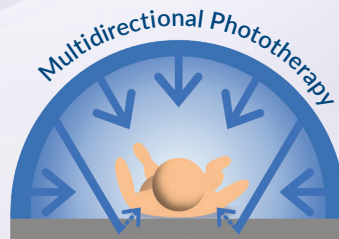

Key Benefits

- Easy set-up and operation.
- Silent performance for a sensory-free environment.
- Attractive, non-clinical design.
- Packs neatly into a protective carry case.
- Easy-clean surfaces for safe reuse.
- Seamless support within the home, also suitable for inpatient phototherapy including Postnatal Ward, Children's Unit, Neonatal Unit and Transitional Care.

Technical Advantages

- High performance — peak irradiance $56 \mu\text{W}/\text{cm}^2/\text{nm}$, wavelength 450–470 nm, bandwidth 430–490 nm.
- Durability — LED lifespan of 50,000 hours.
- Clinically proven — reduced phototherapy time in randomised controlled trials.
- Versatile use — effective at home and inpatient areas.
- Curved reflective canopy and light diffusing nest — exposes maximum skin surface area.
